The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Wydler et al. (5,480,198). Wydler et al. ('198) disclose a driving apparatus comprising a plurality of driving sources (15) connected in parallel and having driving gears in the form of worms (3), and a driven gear in the form of a worm wheel (68) such that the worms (3) are arranged above and below the worm wheel (68) to the assisting mechanism (1). [see figure below]

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP patent to Yokomori in view of Wydler et al. ('198). As shown in Figures 8 or 11, Yokomori discloses a door closer comprising a door striker and latch (46 and 47) attached on the door and vehicle body, an assisting mechanism (Figures 8 or 11) having a driving apparatus/motor (24), a worm gear (25), and worm wheels (27) engaged with the worm gear to assist in the closing of the door through its final closing position (see operation in columns 5-7). Yokomori fails to disclose two driving sources. Wydler et al. ('198) disclose a plurality of driving sources for a driving apparatus. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Yokomori with two driving sources as taught by Wydler et al. since two driving sources allows more control of the driving apparatus.

Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
